OUTLINE

WEB series is a waterproof connector which meets Class IP67 protection against water and dust when mated.

The insert arrangements for this series are the same as those of our JM series connectors with the threaded coupling design.

WEB series has a bayonet coupling design to be suitable for applications requiring quick positive coupling.

FEATURE

1. Bayonet Coupling

This series has a bayonet coupling design. The click sound after rotating the coupling ring gives you the indication of full coupling.

2. 5 Keys to Prevent Mismatching

The shell has five keys. Alternate insert positions eliminate the connector mismatching if more than one connector with the same size and arrangement is to be used in a system. The insulator is permanently positioned in the shell so that only a connector with the same degree of rotation can be mated with it.

3. Quick and Easy Termination

The contacts are preloaded in the connector. The solder cups are oriented in one direction to simplify termination.

4. UL

UL Approved : File No E72124
