◆ OUTLINE

The CM03A series is a Mini-style of the panel mount connector for use in a DeviceNet communication network. Fujikura is manufacturing the receptacles with pin contacts and the plug-receptacles with socket contacts. The connectors are provided with a pre-mating contact which is a first make-last break contact to protect the circuit. When mated, the pre-mating contact is connected first before the other contacts are disconnected last when dismated.

Four (4) positions of connectors are available for

DiviceNet power tap as well as five (5) positions of connectors. CM03A series is IP67 rated and can be used in a wide range of devices and equipment. This series is intermateble with the plug connectors and the jack connectors in our CM03A series(overmolded cable assemblies) and CM03 series.
